

## Let Your Family and Friends Know!

Sloane Hospital for Woman is pleased to offer a simple-to-use service which helps family and friends in touch before, during and after hospitalization. *TLContact* helps families create and update a free, private and personalized home page where they can share the latest news with friends and family and receive their messages of support in a non-intrusive way.

NewYork-Presbyterian has made this service available through [www.nyp.org/carepages](http://www.nyp.org/carepages) for patients and families to be able to create their own on line *CarePage*<sup>SM</sup>. The service is free, very easy to use and easy to set up.

### Basic Service Information

- Baby *CarePages* are free and available through [www.nyp.org/carepages](http://www.nyp.org/carepages)
- Baby *CarePages* are private and not open to the general public
- Family and friends set up the page and supply the updates, not staff
- For more detailed information, tour Baby *CarePages* and access our online help available at [www.nyp.org/carepages](http://www.nyp.org/carepages)

### CarePage Highlights

Baby *CarePages* allow patients and their Caregivers to:

- Create a guest Message Board where friends and family can build a support network without being intrusive
- Share photos with their support community
- Order gifts and flowers

### Privacy and Security

To ensure that all Baby *CarePages* are private and secure, each is protected by a Baby *CarePage* name. The Baby *CarePage* Manager, the person who creates and updates Baby *CarePage* information, chooses this name and it is not available to the general public. The Baby *CarePage* Manager may choose from three levels of privacy, and may change this choice at any time.
